

oval standard gauge table

OVAL GALVANIZED, GALVANEAL AND STAINLESS STEEL GAUGE TABLE			
Major Dimension Duct Width	Spiral Seam	Long. Seam	Fittings
to 24"	24	20	20
25" thru 36"	22	20	20
37" thru 48"	22	18	18
49" thru 60"	20	18	18
61" thru 70"	20	16	16
71" +	18	16	16

Reinforcement for flat span (major axis - minor axis) of oval duct shall be of the same size and spacing interval as specified for rectangular duct or shall otherwise be manufactured to limit wall deflection to 3/4" and reinforcement deflection to 1/4".

NOTES:

1. Flat oval duct is machine formed from round spiral lockseam duct.
2. The oval shape has a smaller flat surface than rectangular duct making it less susceptible to vibration and reducing the reinforcement requirement.
3. Flat oval duct can be supplied in lengths up to 20'. Compared to rectangular duct, oval duct systems will have fewer joints resulting in significant field labor saving.
